:: Design Specs ::

All flyers and print must have atleast a 1/8" cutting margin. We are not responsible for proofing artwork that is sent to print and not designed by us.

All files must also be sent in the appropriate format, CMYK. All files should be sent in jpegs for UV 5000 qt print jobs or eps and pdf's for digital print work less than 5000qt. If you are not sure which kind of print is being used please ask.

:: Promotional Items Artwork Specs ::

Most promotional items are printed in a process called pad printing, which is similar to screen printing, unless noted as full color process job. Artwork must be sent in vector format (Adobe Illustrator or EPS), which is artwork seperated by color. Each color will have its own separate screen. If you need any assistance with setting up your artwork please dont hesitate to ask. If you need artwork converted let us know and we can do it for you, for a fee of \$25 depending on

complexity. Jpegs is not an acceptable format.
